INSTRUCTIONS TO CARE FOR YOUR CHEFFIELD PRESENTATION PIECES:

- Hand wash your serving piece prior to use.
- A coating of Sysco® Supreme Pan Coating or Pam® before use is recommended, as standard operating procedure. This gives it a protective coating and makes it easier to wash.
- Always hand wash using a non-abrasive sponge or cloth after each event. Rinse well and dry thoroughly. Never place your serving piece in a dishwasher or soak-sink.
- Stacking metal on metal or cutting directly on the surface WILL adversely effect the aluminum. We recommend carving on a wood or plastic surface and transferring your food to the serving piece. We recommend using wooden or plastic serving utensils. For high quality wooden utensils we suggest www.scanwood.dk.
- CHEffield Presentation products can be restored to original luster as needed. Complete restoration can be done by your maintenance department or by a local metal polisher. All equipment, supplies and instructions can be obtained from Morris Inc., Chris Morris, 501.268.8188.
